

Writing FCode Programs for PCI

To assist PCI developers in creating Open Firmware compliant products, FirmWorks has created *Writing FCode Programs for PCI*. This manual, available exclusively from FirmWorks, is an adaptation of previously-existing FCode programming documentation that has been customized for Open Firmware and PCI. The book clearly explains the theory and practice of writing and producing FCode programs and is filled with program examples to help you get started.

If you are making the move to Open Firmware on PCI, this book will help you make a smooth transition.

To order your copy, mail, email or fax this order form to:

FirmWorks
480 San Antonio Road, Suite 115
Mountain View, CA 94040-1218
+1 650-917-6990 (fax)
info@firmworks.com

or call:

+1 650-917-0100 (voice)

We accept orders by mail, email, phone or fax. Payment can be made by check or credit card. If paying by credit card, be sure to include the card's expiration date and the billing address of the card if it is different from the shipping address. Please also include your phone number and email address, in case we have a question about your order.

Normally, shipment to US addresses is by Priority Mail and to all other destinations is by airmail. On request, we will also ship by overnight carrier for \$5 handling plus our cost [specify carrier and rate (e.g. overnight/second day/economy) and include your phone number].
